

CV: Stanislav Zaleski

Senior Full-Stack Developer (Ruby on Rails, React)

sigmaray@gmail.com linkedin.com/in/stanislav-z-9a626869 github.com/sigmaray

Location: Remote / Minsk, Belarus **English:** Upper-Intermediate

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 15 years of production experience, specializing in Ruby on Rails, PostgreSQL and React-based web applications. Experienced in building and maintaining scalable web platforms, APIs, admin panels, and data-processing systems. Strong focus on clean code, testing, automation, performance optimization, and production stability. Hands-on experience with Docker, Sidekiq, Redis, RabbitMQ, GraphQL, CI/CD, and APM tools.

TECHNICAL SKILLS

- **Languages:** Ruby, JavaScript (ES6+), TypeScript, CoffeeScript, Go, Python, SQL, Bash
- **Frameworks & Libraries:** Ruby on Rails, ActiveAdmin, Redux, Gin, GORM, Flask, Quart, React, Node.js, Express.js, jQuery
- **Databases:** PostgreSQL, MySQL, Oracle, MongoDB, Redis
- **Message Queues & Background Jobs:** Sidekiq, RabbitMQ, Redis Streams
- **Testing:** RSpec, Capybara, Cypress, pytest, Ansible Molecule
- **DevOps & Cloud:** Docker, Heroku, Ansible, Capistrano, GitHub Actions
- **APIs:** REST, Swagger, GraphQL
- **Frontend:** HTML, HAML, Slim, CSS, SCSS, SASS, CSS Modules
- **Other Tools:** Makefile, Git, SVN

WORK EXPERIENCE

Ruby on Rails Developer | Rubyroid Labs

Apr 2025 – Present

Worked on [BOSSDesk](#) — an enterprise ITSM and asset management platform (cloud or on-premise) for managing requests, tracking tickets, applying SLAs, assigning tasks, and monitoring resolution performance.

- Migrated email integration from Exchange Web Services to Microsoft Graph API
- Migrated parts of the legacy jQuery-based UI to Turbo/Hotwire
- Implemented new features for ticket and asset management
- Investigated and fixed production issues

Technologies used: • Ruby on Rails • PostgreSQL • JavaScript • Turbo (Hotwire)
• Sidekiq • Redis

Backend Engineer (Ruby on Rails, Python) | Telega.in

May 2024 – Apr 2025

Developed and maintained an analytics platform for tracking and evaluating Telegram advertising campaigns (views, engagement rates, conversion metrics).

- Integrated Redis Streams for efficient data handling
- Optimized PostgreSQL performance by adding indexes and improving slow SQL queries
- Resolved critical production issues, including recurring Sidekiq freezes, PostgreSQL deadlocks, and connection pool exhaustion
- Set up comprehensive CI/CD pipelines in GitLab (Pronto/RuboCop, Minitest, PyTest) to ensure code quality and prevent regressions of existing functionality
- Configured APM (AppSignal, Datadog). Fixed bugs and resolved performance bottlenecks that were detected by APM
- Increased test coverage for mission-critical Ruby and Python components.
- Investigated user-reported issues
- Delivered new features

Achievements:

- Improved quality of code
- Decreased the amount of issues in production
- Fixed complex bugs that the team could not fix for years

Technologies used: • Ruby on Rails, ActiveAdmin • PostgreSQL • JavaScript • Docker • Sidekiq • Redis Streams • Python, Quart, pytest

Ruby on Rails Developer | Itransition Group

Sep 2021 – Apr 2023

Worked on the project that helps to segment users with specific criteria and send advertising messages to users from these segments via different channels (email, SMS, push notifications, Facebook private messages).

- Delivered new features
 - New criteria for segmentation
 - New export formats
 - Integration with other projects using RabbitMQ
 - Integration with a third party service with REST API
- Fixed complicated bugs in old code
- Reworked Github Actions pipelines
- Investigated issues in staging and production
- Improved UI/UX
- Optimized performance

Achievements:

- Fixed complex bugs that the team could not fix for years

Technologies used: • Ruby on Rails • MySQL • JavaScript • React • Redis • Docker • Sidekiq • Memcached • Amazon S3 • MongoDB • RabbitMQ • Redis

Full-Stack Developer (Ruby on Rails, React, jQuery) | Upwork

Jan 2014 – Sep 2021

Worked on long-term projects (few years in length) both individually and as part of a team:

- Developing new projects from scratch (Ruby, React)
- Added new functionality into existing projects
- Setting up projects on the server (Ubuntu, Capistrano, Unicorn)

Notable projects:

- [FuturEvolve](#)
 - Communicated with the customer, designed architecture, formulated functional requirements
 - Refactored existing code, covering core functionality with tests (RSpec/Capybara), fixed bugs
 - Developed new modules (database tables, controllers, views)
 - Added ElasticSearch
 - Set up automated deployment with Capistrano
 - Developed REST API and mobile application for Android(Cordova, React, OnsenUI)
- [RatesNet](#)
 - Developed new modules from scratch: creating database tables and GraphQL endpoints
 - Created admin panel using ActiveAdmin
 - Developed UI with React

Technologies used: • Ruby on Rails • MySQL, PostgreSQL • React, Redux • Heroku • Docker • JavaScript, CoffeeScript, TypeScript • Onsen UI, Material UI • Capistrano • Elasticsearch • Active Admin • GraphQL

Ruby on Rails Developer | UXpresso

Jul 2012 – Dec 2013

- Developed new functionality for Education CRM
- Developed several Active Admin based websites

Technologies used: • Ruby on Rails • MySQL • jQuery • JavaScript • Solr • Capistrano • Active Admin

PHP Developer | Light Well Organization

Jun 2011 – Jul 2012

Developed [internet bank for one of the largest Belarusian banks](#) (enterprise-grade platform providing a comprehensive suite of digital financial services for retail customers):

- Wrote PL/SQL stored procedures
- Designed IFX API requests
- Implemented middle-tier business logic using FScript programming language
- Implemented UI using PHP 5 and jQuery

- Investigated user-reported issues, fixed bugs in old code

Developed mobile version of internet bank from scratch:

- Designed mobile-friendly UI from scratch
- Implemented UI using PHP and jQuery Mobile
- Performed manual testing on various mobile devices

Achievements:

- Improved code quality. Rewrote the code in concise and elegant way
- Created a mobile web version of the online banking system, which received excellent user feedback

Technologies used: • PHP 5 • jQuery • Oracle • JavaScript • FScript

PHP Developer | SoftConveyer

May 2010 – Dec 2010

- Developed websites using Joomla CMS
- Developed intranet website for Belarusian mobile operator using Symfony framework

Technologies used: • PHP 5 • MySQL • jQuery • JavaScript • Joomla! • Symfony
